

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

probabilities of a fatal termination. As a fatal case of yellow fever usually represents a considerable number of cases of a milder type I proposed that I should be allowed to see cases of fever existing in the practice of my colleagues. This was immediately acceded to, and an investigation during two hours of the afternoon led to the discovery of 6 cases of yellow fever of a rather mild type.

PHILADELPHIA, PA., *October 28, 1897.*

Yellow fever in the South.

[Continuing the account of yellow fever in the South from November 11.]

November 12: All quarantine restrictions removed by the Memphis, Tenn., board of health. Surgeon Carter ordered to visit Montgomery and Selma, Ala., and arrange for careful post-epidemic disinfection. Inspection of river vessels at Vicksburg, Miss., discontinued.

November 13: Mount Vernon Barracks Detention Camp closed, and the camp equipage stored, by permission of Governor Johnson, in the barracks buildings.

November 15: One case of yellow fever reported in Pensacola, Fla.; the source of contagion in this case is in doubt.

November 17: All disinfection (mails, baggage, etc.) at Atlanta, Ga., discontinued.

November 17 and 18: Heavy frosts reported in the South Atlantic and eastern Gulf States, a minimum temperature of 40° F. being reported at New Orleans. Arrangements are being made for careful post-epidemic disinfection in all infected places.

Yellow fever in the United States as reported to the Supervising Surgeon-General United States Marine-Hospital Service to November 17, 1897. (a)
